

NEW Nirsevimab Dosage Guidelines

Dear Perinatal Healthcare Providers,

In response to dwindling supplies of nirsevimab in Island Health, a review of the evidence supports changing our dosage guidelines. Effective immediately, please use the following dosages for eligible infants:

- ≤7kg 50mg nirsevimab
- >7kg 100mg nirsevimab
- No infant born after 31 March 2024 should be given > 100mg.

In situations where no 100mg doses are available, we will no longer be recommending 2x50mg doses for infants >7kg, since a single 50mg dose will provide effective protection that lasts until the end of RSV season (expected at the end of March or early April 2025).

Further direction regarding when to discontinue offering nirsevimab will be provided later in the season.

Please distribute this information as you see relevant, and do not hesitate to reach out to Public Health Immunization Support if you have any questions or concerns at publichealthimmunizationsupport@islandhealth.ca . If urgent consult is required contact 250-519-5300 extension 32628.

Yours in health,

Dr. Christina Kay, MD, MSc, FRCPC

Medical Health Officer
